Erläuterungen

Vergleichbarkeit

Die Indikatoren und ihre Dimensionen richten sich in erster Linie an der Praxis der UZH aus. So erscheinen bspw. die Fakultäten als Dimension und nicht wie beim Bundesamt für Statistik üblich, die Fachbereiche. Obwohl machbar, ist eine Auswertung der Daten auf Aggregationsebene Institut wenig sinnvoll, denn die Institute unterscheiden sich in ihrer Grösse zu stark. Für zukünftige Analysen oder für Detailmonitorings einzelner Fakultäten wäre die Bildung von Fachbereichsgruppen sinnvoll. Vgl. Detailmonitoring WWF unter <http://www.gleichstellung.uzh.ch/politik/gleichstellungsmonitoring.html>.

Vollzeitäquivalente vs. Personen

Insbesondere bei der Auswertung von Personalstatistiken sind Vollzeitäquivalente (fiktive Anzahl von Vollzeitbeschäftigten einer Organisationseinheit bei Umrechnung aller Teilzeitarbeitsverhältnisse in Vollzeitverhältnisse) als Masseinheit üblich. Aus Gleichstellungssicht reicht jedoch diese Praxis nicht aus, da erfahrungsgemäss in vielen Bereichen der Anteil an Teilzeitarbeit bei den Frauen höher ist als bei den Männern. Um eine daraus entstehende mögliche Verzerrung zu vermeiden, werden primär Personen und ergänzend Vollzeitäquivalente ausgewertet.
