4 December 2023, 4.00-6.00 pm

**Date: Monday, 4 December 2023, 4.00-6.00 pm**

**Location: UZH, BIN-2.A.10, Binzmühlestrasse 14, 8050 Zurich ([MAP](#))**

## «Starting a successful career as a female researcher»

On 4 December 2023 the University of Zurich will host a special event as part of its gender equality strategy. Margaret-Anne Storey, the Verena Meyer Visiting Professor for September-December 2023, will hold an event on the topic of building a successful career as a female researcher, drawing from personal and other experiences in the fields of software engineering and computer science.

The event will focus on how to build a successful career as a female researcher, with Margaret-Anne sharing personal insights on how to succeed as a researcher in an academic or industry position. She will mention successes, barriers and strategies she has experienced along her journey and how she has tried to balance work and family life. She will also invite other participants to share their experiences and advice.

The event and discussion is targeted at female researchers, yet all early career researchers are welcome.

**Prof. Dr. Margaret-Anne Storey**

Verena Meyer Visiting Professor

1.9.2023–31.12.2023
